Drones

General information

Drones, also known as unmanned aerial vehicles (UAVs), are aircraft that may be controlled remotely or independently by onboard computers. Because of their adaptability, manoeuvrability, and low cost, these self-flying vehicles have grown in popularity. Drones are utilised for a wide range of reasons, including aerial photography and videography for leisure or commercial purposes, military and law enforcement operations, search and rescue activities, and agricultural and industrial applications. Drones are often made of lightweight and long-lasting materials such as carbon fibre, aluminium, and plastic. They range in size from massive, multi-rotor systems capable of transporting big payloads to small, single-rotor devices small enough to fit in
